

“Innovative solutions  
to engineering problems”

SPECIAL PURPOSE MACHINERY  
& AUTOMATION SOLUTIONS

JVD Design & Automation specialise in the design and manufacture of machinery solutions / work stations that offer:

- Elimination of Bottlenecks
- Increased Performance
- Waste Reduction
- Reduced Cycle Times
- Increased Accuracy, Quality and Consistency
- Increased Operator Health and Safety

Our strategy is to provide an innovative and cost effective turnkey solution that meet your exacting requirements. All our Design , manufacturing and assembly work is carried out in house ensuring a finished product that is delivered on time and with an outstanding quality of design and build that you will soon come to associate with the JVD Design & Automation name.

We offer the complete service from assessing the initial problem through to design, manufacture and commissioning whilst providing first class onward support. We aim to build long lasting working relationships to continually service and help you develop your business.

Our field of experience covers many aspects of industry - **Contact us for a solution that suits YOU!**
